

GREENGUIDE

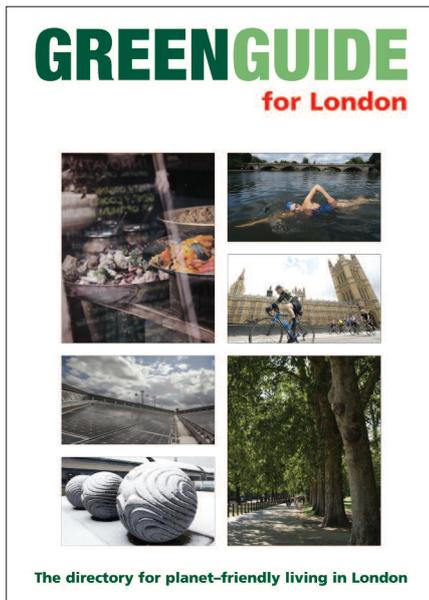

Green Guide for London

The handbook for sustainable living in London

seventh edition, completely revised with a new directory

784 pages, full colour, softback & hardback,

printed on FSC-certified paper in the UK, published in June 2016

At 784 pages printed in full colour, this entirely new London edition will be the biggest and most comprehensive Green Guide to date. The directory contains more than 5,000 entries covering the whole gamut of sustainable urban living. The comprehensive listings are put into context with over 180 pages of editorial, including essays from some of London's leading eco-thinkers and writers alongside 120 case studies, profiles, and reports on the projects that are making the city greener.

We've spent more than three years researching the people, organisations and companies working hard to create businesses and communities dedicated to a planet-friendly way of life. Whether it be a restaurant sourcing local, seasonal food, an architect designing a low-carbon house, a consultant advising on CSR and sustainability, or a theatre cutting waste and saving energy, you'll find them and their story alongside much, much more.

The Green Guide for London will be published in two formats: a softback priced £16.99 and a hardback with a dust cover priced £25.00. Full colour throughout with stunning photography, including more than a dozen full page images, the book is printed in England on FSC-certified paper and to the highest eco standards.

The Green Guides are for the millions of people – consumers and those in business and education – who are seeking out sustainable, greener and more ethical choices in their everyday lives. From food to fashion, from home to office, and from travel to leisure, these people want a way of life and work that is healthier, more natural, better and fairer. The Green Guide covers it all and offers an option for just about anything at home, at play and at work.

But why a near 800-page book? In a time of 140 characters, instant reaction and the all pervasive nature of ego journalism, there is still a place for considered, curated content that places people and ideas at its heart. A book where issues can be explored in-depth, a directory that allows you to follow a thought-process through to an unexpected destination. Green London is vast, sprawling and complex, but it's also exciting, fast-developing and driven by passion. We can't hope to cover everything in a single book, but we do aim to capture the spirit and relentless optimism of our greening capital.

The topics covered are:

- Food & Drink
- Fashion & Beauty
- Home, Building, Garden & Energy
- Sharing, Reusing, Recycling & Waste
- Health & Wellbeing
- Children, Family & Community
- Transport
- Travel, Holidays & Things to do
- Sustainability, Business & Finance
- Politics, Conservation & Campaigning
- Media & Arts
- Information, Education & Careers

The Green Guide, first published in 1994, is the UK's most comprehensive directory of planet-friendly goods, services, contacts and organisations. It is the best source of everything organic, natural, fairtrade and sustainable, containing all the information needed for planet-friendly living
